## PROFILE SUMMARY

---

Computer Science graduate with a strong foundation in Java, Spring Boot, SQL, and Object-Oriented Programming (OOP). Skilled in backend development, database management, and problem-solving with the ability to build scalable and maintainable applications. Quick learner with strong analytical and collaboration skills, seeking an entry-level Software Developer role to apply technical knowledge and contribute to real-world software solutions.

## EDUCATION

---

### Bachelor of Science (B.Sc.) – Computer Science

Government College for Women (Autonomous), Kumbakonam  
CGPA: 8.5/10

June 2023 - Apr 2026

### Higher Secondary Certificate (HSC)

Government Girls Higher Secondary School, Natchiorkoil  
Percentage: 74%

June 2022 - Apr 2023

## TECHNICAL SKILL

---

- **Programming Languages:** Java, Python(Basic)
- **Frameworks:** Spring Boot
- **Databases:** SQL, MySQL, PostgreSQL
- **Web Technologies:** HTML, CSS
- **Version Control:** Git, GitHub
- **API Development & Testing:** REST APIs, Postman
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures and Algorithms
- **Development Tools:** IntelliJ IDEA, VS Code

## PROJECT

---

### FARMER TO CUSTOMER GREENCART

**Tech Stack:** HTML, CSS, JavaScript, Python, Django, SQLite

- Developed a full-stack e-commerce web application connecting farmers directly with customers, featuring role-based authentication for Admin, Farmer, Customer, and Delivery users to manage platform-specific operations.
- Designed a responsive user interface using HTML, CSS, and JavaScript for seamless product browsing, ordering, and user interactions.
- Built backend modules using Django to handle user authentication, product management, shopping cart functionality, order processing, and delivery management.
- Integrated SMTP-based email notification functionality to automatically send order status updates and alerts to customers, farmers, and delivery personnel.
- Designed and managed an SQLite database to store user profiles, product listings, order details, and transaction records efficiently.

### STUDENT LEAVE MANAGEMENT SYSTEM

**Tech Stack:** Java, Spring Boot, Spring Security, Spring Data JPA (Hibernate), PostgreSQL, REST API, Maven, Git

- Developed a web-based Student Leave Management System to automate leave request, approval, and tracking processes.
- Implemented RESTful APIs using Spring Boot for leave application, approval/rejection, and leave history management.
- Designed and integrated a PostgreSQL database using Spring Data JPA (Hibernate) to manage student, faculty, and leave records.
- Implemented role-based access for Students, Faculty, and Administrators using Spring Security with secure authentication and authorization.
- Developed CRUD operations, input validation, exception handling, and business logic to ensure accurate leave processing.
- Used Maven for dependency management and Git for version control, following clean and modular coding practices.
